Dear Sir:-

I am today in receipt of your letter of the 28th stating that the field notes in the application for unsurveyed scrap land did not cover all of the vacant Land in the tract for which application was made . TheLand which was covered by the field notes was supposed to cover all the vacant land and I am today calling attention of the County urveyor to your letter and asking him to make a set of correct field notes to comply with your objections. These will be filed with you immediately when prepared by him which I trust will be within a few days.

Yours very truly

Dear Sir:-

In accordance with your letter advising that the field notes sent you with my application for the vacant unsurveyed or scrap land adjoining the Lynch Survey and being in Harris County,Texas near Lynhhburg, were incorrect, I have had the surveyor to make another survey in accordance with your instructions and he has today delivered to me the corrected field notes which I herewith hand you and ask that they be filed , as provided by law. If there is anything else that you desire done in this matter in order to perfect my rights in this matter I shall appreciate hearing from you, immediately.

This tract of land was formerly covered by Oil & Gas permit issued by your office to A. Lantau. When the application for oil and gas permit was filed the application called in general terms for all land of this peninsula outside the Lynch survey and after survey was made the permit was issued for the tract called for in the field notes covered in the present application As the statute provides that the applicant "shall designate the land by metes and bounds as nearly as practicable and stating that he desires to have the land surveyed " and upon the general description of the oil and gas application permit was issued by your office for only the land covered by the field notes of this application to purchase it seems to me that one not a surveyor would have described the land " as near as practicable" when he used the field notes which had been approved by your office and the County surveyor, as covering the tract applied for described in general terms in the oil and gas application.

Thanking you for your attention to this matter, and with kind personal regards, I am,

Yours very truly,
