Analysis

The Texas Workforce Commission utilizes this site as a workforce center. It is located on the north side of West 7th Street in the central part of Amarillo. The site is improved with a single-story office building, security lighting, and asphalt parking. The surrounding land uses include commercial and industrial developments.

Although the appraisal indicates the highest and best use is to continue in the present use, the agency has requested that the property be included on the recommended list. The GLO recommends the sale/lease of the underutilized property when no longer needed by the agency.

GLO Recommendation:

The GLO recommends the sale/lease of the underutilized property.

Texas General Land Office
Texas Workforce Commission

Analysis

The Texas Workforce Commission utilizes this site as an appeals office. It is located at the southeast corner of Guadalupe Street and West 13th Street in downtown Austin. The site is improved with a one-story office building, a basement-parking garage, and asphalt parking. The surrounding land uses include office, governmental, and residential developments.

The appraisal indicates that the highest and best use is for demolition of existing office and development for more intense use of office building. The GLO recommends the sale/lease of the underutilized property.

GLO Recommendation:
The GLO recommends the sale/lease of the underutilized property.

Texas General Land Office
Texas Workforce Commission

Analysis

The Texas Workforce Commission utilizes this site as a local workforce center. It is located on Old Alice Road just north of US HWY 281 in the central portion of Brownsville. The site is improved with a single-story building and asphalt parking. The surrounding land uses include commercial, residential, medical, and office developments.

The appraisal indicates the highest and best use is for office development to include the present use. The property is currently occupied by TWC, but the agency has indicated they will be vacating the premises in the near future. The agency has requested the property be included on the recommended list.

GLO Recommendation:
Dispose of the property when it is no longer utilized by the agency.

Analysis

The Texas Workforce Commission utilizes this site if the Tax and Appeals office requires overflow parking. It is located on Houston Street in Grand Prairie. The site is unimproved with only unpaved surface parking. The surrounding land uses include residential development and the TWC Tax and Appeals Office.

The appraisal indicates the highest and best use is for residential development. Currently, this site is vacant and it is listed for sale by the General Land Office.

GLO Recommendation:
Dispose of this underutilized site if no longer needed by the agency.

Analysis

The Texas Workforce Commission utilizes this site as a local administrative and tax office. It is located on Texoma Parkway in northern Sherman. The site is improved with a single-story office building and asphalt parking. The surrounding land uses include a cemetery, churches, commercial, and civic developments.

Although the appraisal indicates the highest and best use is to continue in the present use, the agency has requested that the property be included on the recommended list. The GLO recommends the sale/lease of the underutilized property when no longer needed by the agency.

GLO Recommendation:
The GLO recommends the sale/lease of the underutilized property.

Analysis

The Texas Workforce Commission utilizes this site as a local workforce center. It is located at the northeast side of West 287 Business, within the city limits of Waxahachie. The site is improved with a single-story building, exterior security lights, and asphalt parking. The surrounding land uses include vacant lots, medical, residential, and commercial developments.

The appraisal indicates the highest and best use is for office or commercial development to include the present use. The property is currently occupied by TWC, but the agency has indicated they will be vacating the premises in the near future. The agency has requested the property be included on the recommended list.

GLO Recommendation:
Dispose if no longer needed by the agency.

ABOUT THE REPORT
Evaluation Process

ABOUT THE REPORT

Statement of Purpose

Evaluation reports have been prepared in accordance with the Texas Natural Resources Code, Sections 31.157, et seq. The Act requires the Asset Management Division of the Texas General Land Office (GLO) to identify and evaluate designated state-owned real property and accomplish the following:

- determine current market value, and
- identify real property not being used or being substantially underused.

Appraisal Process

Appraisals are performed by GLO staff or outside third party fee appraisers, whose findings are contained in reports on file in the Agency's Appraisal Division. Field staff measure and examine buildings to determine structure, composition, and condition. The resulting data is processed using the Marshall and Swift Valuation Service to derive replacement and depreciation values. Using the Market Data approach, area markets are examined, and the current market value of the land is determined.

The 79th Legislative Session, HB 957, Section 1, now allows a restricted appraisal report to be performed on properties that have a "retain" recommendation. The value determination can be satisfied by information including only evidence of value as the Commissioner of the GLO deems appropriate. The properties that are recommended for sale will be evaluated with a full appraisal.

All findings are based on market data and conditions as of the appraisal date. GLO appraisers certify that in the case of values over one year old, markets have not changed to alter appraisal figures. Appraisers do not make forecasts of future trends not already indicated by current real estate activity.

Evaluation Process

Analysis

The GLO analysis staff reviews appraisal findings and performs additional research to determine the following:

- pattern of land utilization for each facility
  - land that is economically underutilized
  - land not being used for agency or facility functions
- development potential for underutilized/unused property

This analysis should be viewed as a preliminary feasibility study which identifies potential alternate uses. Additional research would be necessary prior to marketing the property to insure accurate forecasts of land use, income streams, transaction costs, and implementation scenarios.
The Evaluation Process

Definition of Terms

Evaluation reports may employ the terms defined below.

**Market Value** -

The amount one can expect to receive if the property were sold on the open market, and the highest price which a property will bring if offered for sale in the open market, with reasonable time allowed to find a knowledgeable buyer and assuming reasonable financing terms. This definition implies the concept of a willing buyer and seller, neither of whom is put under undue duress and both having been given time to consummate the sale.

As a result of rounding, market value is not expressed as the sum of land, improvements, and site improvements that are reported.

**Highest and Best Use** -

The most profitable, likely, legal use to which a property can be placed. It is that which may be reasonably expected to produce the greatest net return and/or enjoyment over a given period of time.

**Floor-to-Area Ratio (FAR)** -

A measure of development intensity used to judge relative land utilization. FAR is the ratio of built gross floor area compared to the gross site area. This factor is a useful index of economic efficiency when compared with typical FARs for given categories of use.

**Grade** -

The horizontal elevation of a finished surface of the terrain from where a height will be measured.

**Lot** -

A parcel with a separate number or other designation as shown on a plat.
