Exhibitory Cert

The State of Texas
Hays County

I, B. L. Hardin surveyor of Hays Co. herewith certify that I found the W. corn. of Wm Wards survey from which an Elm bears S. 35 W. 5 vs. and an other Elm bears N 25 E 10 vs and that I also found the Veremendi E. corn. from which a Mesquite bears N 75 W. 144 vs. and that the course and distance between the two corners is by actual measurement on the ground S.... E..... varas
Also that I found the N. corn. of J. Miners survey from which a mesquite bears N. 23 E 570 vs. and that the distance between between sd. Miners N. corn. and sd Veremendis E. corn. is N.... E..... varas.

If the surveyor fills out the blanks of the two courses between the 3 corners mentioned in the above certificate and signes said certificate officiacy he will give the Gen. Land Office an opportunity to examine the surveys of R. T. Hughes 3-715; John Jones D-646 and A. McKowne. Certificates not kept in the above particularities will not be regarded. March 17/72

Statement.

According to the fieldnotes of Mary Ann Clark and the connection between the Joel Miners N. corner and the J. W. Williams S. corner by a distance of 479 vs. and according to the fieldnotes of the surrounding surveys, the following discrepancies will appear. to wit:

The distance between the sd. Williams N. E. line and the Atkinson S. W. line is 257 vs while the R. T. Hughes survey and the Jones survey makes the same 450 vs. consequently will conflict with sd. Williams 193 vs. also the distance between the Atkinson and the Hinton survey is not so great as the fieldnotes call for; as the fieldnotes call for 668 vs it is by calculation only 585 vs.

The S. lines of Hinton survey and Green survey is by their fieldnotes only 4046 vs this survey makes it 4105 vs and consequently the distance between the Stuart survey and the Green survey will be 165 vs and the distance to the beginning 631 vs instead of 489 vs.

If the surveyor shows that he found the N. E. & W. cor. of Memphis survey and states that the distance between the same is that much longer, and states that the Ward survey does not adjoin the Miner survey and be that much apart, then the discrepancies will disappear; but the surveyor has to show that he found the true corners by describing same in his certificate.
