San Marcos Texas Jany 2nd 1892

To the Commissioner of
the Genl. Land Office
Austin Texas

Dear Sir

In sending up the enclosed notes of Strechmer's survey, I thought it best to make a statement of the method adopted, to establish the lines of the Samuel Craft — On its N.E. line there is a call of 3280 vs from a branch of Yorks Creek — this is in the mountains, has a rocky bed, where the line crosses, and is consequently unchangeable, this line was measured twice — I then went to the East line, of the Nancey Kenner League — which is the west line of the Craft, (the bearings are gone on the West corner of the Craft —) there is a call on this line, for the foot of the mountains, almost as good (as a natural object,) as a creek — the calls are 1934 vars, from this point to the East corner of the Nancey Kenner, from this call I established said corner, (allowing 26 vs) then taking the calls of the Samuel Craft, I crossed the branch of Yorks Creek at the proper distance, but the distance to Yorks Creek, from this point was 100 vs less, than called for in Craft notes, but our corner, carried us to the center of the crossing — this crossing has not changed, on account of a bluff shore, on the East side of the creek below, and a bluff on the West side above — From this point we intersected, the West line of the Vanhorn, within a few feet of the South corner, as located by the measurement, from the branch 3250 vs; running on the calls of the Craft — I further tied the corner of this point; I ran the Esnaurizar line from the crossing of Yorks Creek, to the west corner of the John Owens — then the South line of the Owens, observing a call on the north line of the Esnaurizar — for a branch of Yorks creek at 2100 vs, found this correct — 133 vs from the corner of the Owens — ran north 900 vs, for the West corner of the Thomas Bell,

Tex bearing of witness tree N 70° 30' W 290 vs from this Tex bearing for the Craft corner S 21° E 110 - also for the Vanhorn corner S 11° E 110 - From the point established as the Vanhorn corner I run East, on Vanhorn line, (conflicting with the Bell) 1090 vs, Thence with Vanhorn line N 70° E 645 varas, to within three varas of East corner of Vanhorn -

The notes include all the road, but as Strohmer applied for only the vacant land above the road - 12 acres must be deducted from the amt for the road - 60 feet in width - according to my calculation the lines as run, include 54 60/100 acres - in my notes I state the amt to be 42 60/100 acres - I mention this, as the notes call for the 54 60/100 acres while the amt. at the heading is 42 60/100

Resp'y

Jany 2nd 1892

Jno H McNutt
Co Surv. Hays Co Texas

I had a plat made at 500 vs to the inch and concluded to send it as the points are somewhat better illustrated, than they would be, on a smaller scale,

McNutt

To--the --Commissionier Genl. Land Office,
Austin, Texas,

Dear Sir:

We, the undersigned, respectfully protest against the issuance of a patent on Travis Scrip 1733 and Travis Scrip 17221/2---------- For the reason that the said land has been recognized as a part of the Samuel Craft leggue for the past thirty years, and because it is within our inclosure.

Should your Office recognize a vacancy in this place, we, as owners of the land wish to avail ourselves of the privel--edge given under the law passed by the 21st Legislature in 1889 as indicated in Chapter 54--Page 48 & 49 of the revised Statutes, and to which law we respectfully beg to call your attention.

Please file this in Travis Scrip 17221/2, and notify us of your action in the matter.

Respectfully,

E M Haase

Wm Simon
