640 Acres.

State of Texas--General Land Office,

This is to Cert... That the **Houston East and West Texas Railway Company,** having completed the Second section of Ten and one-half (10½) Miles of Main track and Sidings, is entitled, in accordance with the provisions of its charter and the General Law regulating railroads, to **Six Hundred and Forty Acres of Land,** to be located upon any of the vacant and unappropriated public domain of the State of Texas.

The Lands granted to said Company are to be located in the following manner:

1—Two sections of land adjoining and connecting with each other must be surveyed, one for the State and the other for the Company. 2.—The surveys to be made square, unless prevented by previous entries or navigable streams. 3.—When the field-notes have been returned to the General Land Office, the Commissioner will number the surveys and report the result to the Surveyor, who will fill up the blanks left in his record for that purpose, accordingly. (As a matter of convenience in describing the surveys, when reporting the numbers the Surveyor should number the field-notes temporarily, in pencil.) 4—In dividing the surveys, a fraction of over three hundred and twenty acres will be counted as a whole section, and two fractions of less than three hundred and twenty acres will be regarded as a section. 5.—The even numbers will be reserved to the State, and the odd numbers to the Company.

In Testimony Whereof, I hereunto set my hand and affix the impress of the Seal of said ...e, this 31st day of May, A. D. 1878.

Chief Clerk and Acting Commissioner.

Explanation the Surveyor in locating the Hays Co. S. Lands, located the E. H. Russell as here represented and corrected the Field-Notes to agree with No. 14. The Gen. L. Office recognised his corrections; patented the Hays Co. S. Lands and maped the E. H. Russell as corrected. The Surveyor in locating Joseph Rackowitz's Preemption started on the J. L. McCrocklin E. line and found the E. H. Russell as here represented. I started at S.W. corner of the Hays Co. S. Lands and ran to internal angle of the J. Rackowitz Preemption and was certain that I was

on E. line of the E. H. Russell as located. In regard to the other surveys viz. Joseph Rackowitz, J. H. Edwards & Samuel Johnson I found the corners with their bearings. I started at the N.W. corner of G. Guerrdo No. 5 and found the N.E. corner, made a corner for the S.E. corner and found an old rock pile corresponding with course and distance for the S.W. corner. I also found the two lower or S corners of the Hays Co. S. Lands.
