Gulf of Mexico Energy Security Act (GOMESA)
Funding Policies & Guidance
December 2019
Gulf of Mexico Energy Security Act (GOMESA) Funding Policies & Guidance

Introduction
The General Land Office (GLO) oversees the administration and distribution of the Gulf of Mexico Energy Security Act (GOMESA) funds to selected projects as authorized under Public Law 109-432. GOMESA was enacted in 2006 and requires the Bureau of Ocean Energy Management (BOEM) to disburse a certain percentage of all qualified Outer Continental Shelf revenues, including bonus bids, rentals and production royalty to four Gulf producing states (Alabama, Louisiana, Mississippi, Texas), their coastal political subdivisions and the Land & Water Conservation Fund for coastal restoration projects. The amount distributed to each state and political subdivision is based on the sections of lease tracts that open each year and the distance from those sections to the states and political subdivisions. Since GOMESA funding is dependent on oil prices and lease sales, it is unknown exactly how much funding each state will receive each year. BOEM does a calculation of the previous year’s OCS revenue for GOMESA funding and then deposits those funds into state treasuries the following April without prior notice or estimations of the deposit amounts.

For additional information regarding revenue sharing phases see:

https://www.boem.gov/Revenue-Sharing/

Authorized Uses
GOMESA funds may only be used for projects that satisfy one or more of the following statutorily authorized uses:

1. Projects and activities that are for coastal protection, including conservation, coastal restoration, hurricane protection, and infrastructure directly affected by coastal wetland losses.
2. Mitigation of damage to fish, wildlife, or natural resources.
3. Implementation of a federally-approved marine, coastal, or comprehensive conservation management plan.
4. Mitigation of the impact of outer Continental Shelf activities through the funding of onshore infrastructure projects.
5. Planning assistance and the administrative costs of complying with GOMESA requirements.

GLO GOMESA Program Goals & Objectives
The goal of GOMESA funding is to conserve, restore, enhance, and protect the diversity, quality, quantity, functions, and values of the state’s coastal natural resources. A primary focus for the GLO will be to protect coastal natural resources while facilitating multiple human uses of coastal resources.

The GLO’s priority for the expenditures of GOMESA funds include:

1. Restoring and enhancing coastal natural resources;
2. Providing hurricane protection for coastal public resources;
3. Improving water quality;
4. Enhancing the balance between the protection of coastal natural resources and public use of those resources;
5. Improving environmental management; and
**GLO Administration of GOMESA Funds**

Texas expects to receive a significant increase in GOMESA funding with the beginning of Phase II. To maximize this opportunity, the GLO is working to further initiatives that efficiently and effectively advance GLO coastal priorities. The GLO will use GOMESA funds to support projects that meet the GOMESA authorized uses, Coastal Management Program (CMP) or Coastal Erosion Planning and Response Act (CEPRA) Program goals and objectives, and GLO priorities identified in the Texas Coastal Resiliency Master Plan. Specifically, GOMESA funds will be used to facilitate the initiation of essential coastal projects that comply with the GOMESA authorized uses, such as planning, permitting, design and implementation of coastal projects.

GOMESA funds will be allocated through the CMP and CEPRA funding programs. Applicants will not apply directly for GOMESA funds. Instead, applicants will apply under the CMP or CEPRA programs. If a project is determined to be eligible under these program requirements, GOMESA funds may be used to fully fund a project or be administered as a supplement to CMP or CEPRA monies. Applicants must meet all the CMP or CEPRA program rules, policies, deadlines, and associated funding constraints to receive GOMESA funds.

CMP and CEPRA applications will be evaluated and scored based on the respective program’s project scoring criteria. Once applications are scored and projects selected to potentially receive GOMESA funding, the respective program staff will evaluate the projects to determine if the projects meet at least one of the GOMESA authorized uses.

GOMESA funds will be allocated to CMP projects designated as Projects of Special Merit (PSM). Information on the PSM selection process can be found in the CMP Grant Guidance document. The purpose of the CMP is to improve the management of the state's coastal resources and ensure the long-term ecological and economic productivity of the coast. The program is based on the Coastal Coordination Act in Texas Natural Resources, Chapter 33, and the CMP goals and policies in Title 31, Texas Administrative Code, Chapter 501. Under Texas Natural Resources Code, Section 33.204, the Commissioner of the GLO (Commissioner) may use public funds such as GOMESA, to award grants to projects that further the goals and policies of the CMP. Eligible entities are listed in the CMP Grant Guidance document.

GOMESA funds will be allocated to CEPRA projects based on the outcome of the CEPRA review and scoring process, detailed in the CEPRA Funding Application Guidance document. The purpose of the CEPRA program is to implement coastal erosion response projects and studies to reduce the effects of and understand the processes associated with coastal erosion as it continues to threaten public beaches, coastal natural resource areas, coastal development, public infrastructure, and public and private property. Under Texas Natural Resources Code, Section 33.603, the GLO is authorized to undertake coastal erosion studies, demonstration projects, and response projects if the GLO receives legislative appropriations or other funding. If reasonable and appropriate, the GLO must work in conjunction with other state agencies, local governments, federal agencies, including the United State Army Corps of Engineers, or other qualified project partners in undertaking those studies or projects. GOMESA funds can be used to pay for erosion response projects and studies associated with CEPRA eligible projects. This includes both Tier 1 and non-Master Plan projects.

GOMESA funds will be awarded to CMP and CEPRA projects via the respective program’s selection process and at the Commissioner’s sole discretion to projects that meet GOMESA’s authorized uses. In using GOMESA funds, the Commissioner will consider the following factors:

- Equitable distribution of funds along the Texas coast,
- Advancement of projects that have state-wide or regional benefits,
Facilitate the implementation of large-scale projects.

GOMESA funds may be made available to the GLO for planning, administration and facilitation of priority projects as determined by the GLO. Where appropriate, GOMESA funds will be leveraged with other funding sources to enhance collaboration between the program areas and provide better opportunities to complete comprehensive, large-scale projects such as those identified in the Master Plan.

For guidance on applying for CMP grants and CEPRA funding, please see the GLO’s grant projects funding web site:

http://www.glo.texas.gov/coast/grant-projects/funding/index.html

Eligibility Requirements
GOMESA funds are being funneled through the CMP and CEPRA programs. Applicants must meet all eligibility requirements of either the CMP or CEPRA program and meet the project requirements of GOMESA to receive these funds. See the CMP and CEPRA program guidance documents for specific eligibility requirements.

The CMP and CEPRA program guidance documents will cover requirements regarding the following:

1. Eligible Applicants
2. Project Location
3. Funding Categories
4. Application Processes and Deadlines
5. Funding Policies, Amounts, and Cost Sharing
6. Federal Consistency
7. Data Standards
8. Permitting
9. Project Evaluation and Selection Criteria
10. Program Specific Rules and Regulations
11. Contract Administration Requirements

Allocation of GOMESA Funds

GOMESA funds will be allocated through the CMP and CEPRA programs or by the selection and funding of projects that meet GOMESA requirements and GLO priorities.

1. Proposed Funding Allocations
GOMESA funding will be disbursed each distribution year for eligible projects based on the following percentages: the CEPRA program will receive approximately 65%, the CMP will receive approximately 15%, and the remaining approximate 20% will be used for planning, administration and to facilitate the initiation and completion of other coastal projects. Not more than 3% of the total amount received by the state can be used on planning assistance and administrative costs pertaining to distribution GOMESA funds under this program. GLO planning assistance and administrative costs may include expenses such as personnel, supplies, equipment, services and other expenses related to administering the program; grant monitoring activities, programmatic studies, planning, and auditing; and public or community relations activities.
2. **Selection of Projects**
   a. Once applications for CMP and CEPRA have been received, the proposed projects will be reviewed by the respective review team and evaluated under the requirements of the CMP and CEPRA. Specifically, GOMESA funds will be used to facilitate the initiation of essential coastal projects that comply with the GOMESA authorized uses, such as planning, permitting, design, and implementation of coastal projects. Projects identified in the Master Plan will be given priority for GOMESA funding.
   b. The remaining 20% of funding may be used to pay for GLO planning and GOMESA program administration or leveraged with other funding sources such as, Natural Resources Damage Assessment (NRDA), National Fish and Wildlife Foundation (NFWF), Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act (RESTORE), Federal Emergency Management Agency (FEMA) and Department of Homeland Security (DHS) to enhance collaboration and provide better opportunities to complete comprehensive, large-scale projects such as those identified in the Master Plan that comply with the GOMESA authorized uses. All selected projects using GOMESA funds will be evaluated and approved by management.

3. **Cost Limitations**
   The use of GOMESA funds must comply with the funding and financial reporting requirements, policies and limitations of the program (i.e. CEPRA or CMP) through which the monies were awarded. The Commissioner will limit indirect costs charged when using GOMESA funds, whether funded through CEPRA, CMP, or directly from GOMESA, to a maximum of 15% of Modified Total Direct Costs (MTDC) as an allowable cost for reimbursement, if the recipient of GOMESA funds has a current indirect cost rate negotiated with a contracting federal agency. This maximum 15% indirect cost rate must be applied to MTDC as negotiated in the recipient’s indirect cost rate agreement (NICRA). The recipient’s subcontractors must also comply with the maximum 15% indirect cost rate limitations. The recipient may not charge “other operating costs” (i.e., administrative costs, equipment usage fees, computer usage fee, etc.) in addition to indirect costs, if such costs are already included in the calculation to determine the recipient’s indirect cost rate.

   A copy of the NICRA must be submitted with the application.

4. **Fringe Benefit Cost Limitations**
   The Commissioner will limit fringe benefit costs to the recipient’s published rate not to exceed 35% of salaries and/or wages.
GOMESA Frequently Asked Questions:

1. Can a recipient who is selected through the CMP selection process use GOMESA money to purchase equipment?
   • Any equipment purchase must be directly related to an authorized GOMESA use.
   • Any equipment purchases must be preapproved by GLO in writing.
   • Equipment purchased prior to the approval of the project will not be eligible for reimbursement.

2. What are the limits on the use of GOMESA funds?
   • Funds may only be used for authorized GOMESA authorized uses.
   • Funds must be spent in accordance with the project budget that is approved as part of the recipient agreement.
   • Funding will be constrained by the actual amount received by Texas each year and subject to the administrative costs cap of the GOMESA program.
   • Funds may be used as non-federal match.

3. How will projects using GOMESA funds be monitored for timely completion?
   • Projects must be completed within a two-year timeframe. If circumstances require the recipient may be able to utilize an option to do a no cost time extension to add a third year. A request for such an extension must be submitted to the GLO in writing prior to expiration of the agreement and will not be effective until approved by the GLO.
   • Depending on the size and scale of the project, timeframes for completion may vary. As a result, during the application stage, the project should be submitted with detailed timeframes for development, planning and completion, and if applicable, broken out into specified project phases. All timeframes must be included in the application and approved by GLO staff. During review of an application or after initial approval of a project, GLO staff may negotiate different terms and time frames for a project, as appropriate.
   • The reporting requirements will be specified in the recipient agreement and forms will be available on the GLO’s website.

4. When will GOMESA funded projects start?
   • Projects are eligible to may start as soon as the GLO contracting process with the recipient is complete. The start and end dates for GOMESA funded projects will be defined on a case-by-case basis for each project and may be incorporated into the contractual instrument between the recipient and the GLO. The state date for initiation of a project is sometimes based upon the GLO’s issuance of a notice to proceed.
