### Grant Application

## Project Summary

### **Project Summary**

A concise project summary page that describes the activity and deliverables that would result if the project is funded and how the proposed project will benefit the spill response program and or community. It should state the objectives and methods to be used. It should also address the practical merit of the proposed activity and the potential impacts of a successful conclusion of the activity.

### Grant Application

## Description

### **Research, Testing, and Development of Oil Discharge Prevention and Response Technology and Training.**

State the research objectives of the applications and explain their importance. Please see the Request for Applications for further information. Application must explain how the research will enhance, assist, or move forward the Texas General Land Office's mission on Oil Spill Prevention and Response.

### Grant Application

#### **Institutional Commitment and Sources of Additional Support**

Describe facilities, services and other institutional resources that will support the proposed work. Describe Respondent's plan to maximize the value of the GLO grant funds by obtaining additional support from other public and private sources. Please see the Request for Applications for further information.

#### **Value Added**

If the Project has "value added" possibilities outside oil spill prevention and response, please, provide a brief explanation of such benefits.

### Grant Application

## Budget

The budget document is a separate document that must be completed and submitted along with this application.

## Timeline

The application must include a project timeline that specifies when major activities will begin and objectives will be completed. For approved applications, if a timeline cannot be met, the GLO must be notified in writing immediately.

### Grant Application

## Investigators

Résumé(s) for the principal investigator and each co-principal investigator must be submitted with the application. These documents should be no more than two pages per individual. Include selected publications from the last five years. When listing publications, use the standard bibliographic style of listing the senior author first. Additional materials may be included as necessary. If a letter of transmittal is included with the application, it should not contain information that is necessary for the review process.

## Experience

Provide information on current and pending support on oil spill related projects. If the proposed research, testing or development has been previously funded by another agency, please indicate this in the table.
