Report

This Progress Report is to provide the GLO with evidence that the projects are attaining technical milestones and accomplishments necessary to achieve the objectives outlined in the original proposal. The reporting will provide an initial baseline to determine the future success of the project. This is also an opportunity for your agency to identify any challenges or explain any desired changes in the composition, directions, or key personnel associated with the project. Finally, this report serves as a means to consult with specialists at the GLO and to detail the planned action for the project for the next reporting period.

Project Objectives:

**Texas General Land Office
Oil Spill Prevention and Response Program
Progress Report**

Milestones or Accomplishments This Reporting Period:

Expected to complete (Field)

Expected to complete (Non-Field)

Not expected to complete
