

Texas General Land Office

Oil Spill Prevention and Response

Oiled Wildlife Response Information Guide

General Response

- Federal regulations prohibit handling of migratory birds.
- Untrained personnel should not attempt to rescue oiled wildlife because of the potential for serious, sometimes fatal, zoonotic diseases (transmission of disease from animal to human).
- Untrained personnel can inflict serious injury or be injured by oiled animals.
- Only personnel from state fish and game agencies and U.S. Fish & Wildlife Service or properly trained and permitted rehabilitators designated by these agencies are allowed to capture oiled wildlife.
- Appropriately notify and await instructions from permitted personnel for handling affected wildlife.
- Only personnel permitted by the State of Texas are allowed to handle oiled wildlife.
