

Sound Management Practices Program Statement of Intent

This form serves as official notification that my company is actively employing a Sound Management Practices Program (SMPP). I certify that all facilities and/or vessels of which I am an owner/operator actively employ an SMPP that includes the following elements:

- (1) Statement of Intent
- (2) Written policies, procedures, and methodologies to ensure compliance
- (3) Training documentation
- (4) Post spill auditing processes

I request that the Texas General Land Office accept this Statement of Intent and apply the appropriate penalty matrix should an oil spill occur in which I am the responsible party. I understand that the GLO may review our SMPP if circumstances warrant, including during an oil spill investigation.

For GLO certified facilities, the Statement of Intent should be updated with appropriate contact information as needed and, at a minimum, during a facility recertification.

For OSPRA regulated vessels, one Statement of Intent is required per vessel owner/operator. All vessels must be appropriately registered in the GLO vessel response plan system to receive SMPP credit.
