TEXAS BOARD OF PROFESSIONAL ENGINEERS
AGENCY SUMMARY
Texas General Land Office

Texas Board of Professional Engineers

Agency Summary

Background/Authorities

The Texas Board of Professional Engineers (TBPE) was established to license and regulate the practice of professional engineers in Texas. It was created in 1937 by the 45th Legislature, Regular Session, in accordance with standards of practice set forth in the Texas Engineering Practice Act, Article 3271a, Texas Revised Civil Statutes. The Board administers and enforces licensing procedures. Decisions relative to departmental operations, including disposition of real property, are made by the board of directors.

The agency is subject to the regulations of Texas Revised Civil Statutes Article 601b, which requires that the Texas Facilities Commission acquire or lease all real property for the Board. Sale of agency properties is also regulated by the Texas Natural Resources Code § 31.158, et seq., which requires that all sales be authorized by the legislature and administered by the General Land Office (GLO).

Real Property Assets

The Board owns one two-acre tract and building at 1917 South IH 35, Austin fronting on the access road to IH 35 and is two miles south of the Central Business District and Capitol Complex. The building is a one-story, steel-frame and plaster office building with a paved surface parking lot. In addition there is a small covered parking area under one end of the building. The site is extensively landscaped with a 31,000 square-foot mini-park for its employees. The surrounding area includes similar office buildings, commercial service facilities, and multifamily and single-family residential development. The agency does not occupy any leased properties.

GLO Recommendation

The GLO recommends the sale of Parcel 17, a 0.226 parcel of TBPE property. The remaining 1.774 acres will be retained for continual use by TBPE.

AGENCY COMMENTS

The agency is in agreement with the disposal of the 0.226 parcel of land. The property will be sold by TBPE.

TEXAS FACILITIES COMMISSION COMMENTS

No comments were received from TFC concerning this agency's property.

TEXAS BOARD OF PROFESSIONAL ENGINEERS
PROPERTY TO BE RETAINED
Texas General Land Office
Texas Board of Professional Engineers

Texas Board of Professional Engineers

Location:
1917 IH 35 South, Austin, Travis County, Texas

Legal Description:
Volume 6028, Page 2151, Travis County Deed Records

Encumbrances
Physical: None
Legal: Deed Restrictions: None
Easements: Utility

Acres: 2.00
Sen. Dist.: 14 Rep. Dist.: 51 FAR: 0.11
% in Floodplain: 0% Slope: Steep

Zoning: Office
Utilities: Electricity, Gas, Telephone, Wastewater, Water Line
Surrounding Uses: Residential, Commercial, Office
Current Use: State Office Building
Highest and Best Use: State Office Building
Agency Projected Use: State Office Building
Texas General Land Office

Texas Board of Professional Engineers

Analysis

The Texas Board of Professional Engineers (TBPE) utilizes this site for central administrative offices and registration. It is located along the east side of IH 35, between Woodland and Mariposa Streets in Austin. The site is improved with a one-story office building and surface parking. The surrounding land uses include office, commercial and residential development.

TBPE plans to dispose of 0.226 acres of the property. The remaining 1.774 acres will remain and be utilized by the agency.

GLO Recommendation:
Dispose of 0.226 acres of underutilized property. Retain the remainder of the property for continued agency use.
TEXAS DEPARTMENT OF PUBLIC SAFETY AGENCY SUMMARY
Agency Summary

Background/Authorities

The enabling statute contained in Chapter 411 of the Texas Government Code in 1935 by the 44th Legislature created the Texas Department of Public Safety (DPS). The statute was codified in its present form in 1989 by the 77th Legislature.

Oversight of the Department is vested in the Public Safety Commission (PSC), a five-member board appointed by the Governor to serve staggered six-year terms. The day-to-day operations of the Department are the responsibility of the Director, who is supported by 2 Deputy Directors and 13 Assistant Directors.

The law enforcement operations of the Department are performed by 13 major Divisions. This structure aligns the Highway Patrol, Criminal Investigation, Intelligence and Counter Terrorism, Texas Rangers, and seven Regional Commanders headquartered in Garland (Region 1), Houston (Region 2), McAllen (Region 3), El Paso (Region 4), Lubbock (Region 5), San Antonio (Region 6), and Austin (Region 7), under the Deputy Director – Law Enforcement.

Real Property Assets

This report covers 122 DPS-owned tracts totaling 1,494.47 acres. These properties are designed for use as state administrative offices, regional and district headquarters, local area offices, driver license offices, communication towers, and undeveloped sites where DPS has plans to build new facilities. For this report the General Land Office (GLO) appraised and analyzed market values and existing or proposed uses of these sites. Agency-leased properties were not evaluated.

Geographic Locations

Evaluated properties are located across the state. DPS has developed seven regions for administrative purposes.

Utilization

By statute, the state headquarters is located in Austin. The facility houses regulatory, supervisory, budgetary,
Texas Department of Public Safety

accounting, and record-keeping activities. The headquarters also houses, law enforcement, crime lab, crime records, communications, information technology, emergency management, training academy, dormitories, and fleet operations.

The low floor-to-area ratio indicates that the site is underutilized. However, building location, uneven topography, and drainage problems limit more intense site uses.

Several structures on the campus are currently uninhabitable and have Facility Construction Indexes exceeding 60%.

The agency intends to continue its current operations at this site with no immediate plans for expansion or renovation. Current utilization of this facility corresponds with the property's highest and best use.

Regional and district headquarters, that house administrative offices, occupy sites ranging from three to six acres.

Sites are typically located in one of the larger cities in each region. Good visibility and accessibility for the public are desirable attributes in site location.

Local offices, generally occupy sites of less than five acres, are located where needed, based on local safety needs.

GLO Recommendations

The GLO recommends disposing of the El Paso Land Crime Lab (GLO ID # 2602), the Marion County Cabin (GLO ID # 2606), and the Paris Area Office (GLO ID # 1755).

The GLO recommends retaining all other DPS property at this time.

AGENCY COMMENTS

All comments from received DPS have been incorporated into the report.

TEXAS FACILITIES COMMISSION COMMENTS

No comments were received from TFC concerning this agency's property.

ABOUT THE REPORT
Evaluation Process

ABOUT THE REPORT

Statement of Purpose
Evaluation reports have been prepared in accordance with the Texas Natural Resources Code, Sections 31.157, et seq. This legislation requires that the Asset Management Program Area of the Texas General Land Office (GLO) identify and evaluate designated state-owned real property and accomplish the following:

- identify real property not being used or being substantially underused, and
- determine current market value, for properties recommended for disposition

Appraisal Process

Appraisals are performed by GLO staff or outside third party fee appraisers, whose findings are contained in reports on file in the Agency's Appraisal Division. Field staff measure and examine buildings to determine structure, composition, and condition. The resulting data is processed using the Marshall and Swift Valuation Service to derive replacement and depreciation values. Using the Market Data approach, area markets are examined, and the current market value of the land is determined.

House Bill 957 of the 79th Legislature requires a value determination for all properties recommended for disposition. If a property is not recommended for disposition, a value determination shall be in a form deemed appropriate by the Commissioner. As such, properties recommended for disposition shall be the subject of a full appraisal while properties not recommended for disposition shall be the subject of an inspection and utilization analysis.

All findings are based on market data and conditions as of the appraisal date. Appraisers do not make forecasts of future market trends not already indicated by current real estate activity.

Evaluation Process

Analysis

The GLO analysis staff reviews appraisal findings and performs additional research to determine the following:

- pattern of land utilization for each facility
  - land that is economically underutilized
  - land not being used for agency or facility functions
- development potential for underutilized/unused property

This analysis should be viewed as a preliminary feasibility study which identifies potential alternate uses. Additional research would be necessary prior to marketing the property to insure accurate forecasts of land use, income streams, transaction costs and implementation scenarios.
The Evaluation Process

Definition of Terms

Evaluation reports may employ the terms defined below.

Market Value -

The amount one can expect to receive if the property were sold on the open market, and the highest price which a property will bring if offered for sale in the open market, with reasonable time allowed to find a knowledgeable buyer and assuming reasonable financing terms. This definition implies the concept of a willing buyer and seller, neither of whom is put under undue duress and both having been given time to consummate the sale.

As a result of rounding, market value is not expressed as the sum of land, improvements, and site improvements that are reported.

Highest and Best Use -

The most profitable, likely, legal use to which a property can be placed. It is that which may be reasonably expected to produce the greatest net return and/or enjoyment over a given period of time.

Floor-to-Area Ratio (FAR) -

A measure of development intensity used to judge relative land utilization. FAR is the ratio of built gross floor area compared to the gross site area. This factor is a useful index of economic efficiency when compared with typical FARs for given categories of use.

Grade -

The horizontal elevation of a finished surface of the terrain from where a height will be measured.

Lot -

A parcel with a separate number or other designation as shown on a plat.
