

**TEXAS WORKFORCE
COMMISSION
AGENCY
SUMMARY**

Agency Summary

Background/Authorities

The Texas Workforce Commission was created September 1, 1995 by the 74th Legislature with the passage of House Bill 1863. Prior to this Act, the agency was known as the Texas Employment Commission. The creation of the Texas Workforce Commission (TWC) consolidated all workforce-related programs in one agency. In addition to the workforce and welfare related programs, the TWC administers Texas' Unemployment Insurance and Labor Law programs. The legislation also established 28 statewide local workforce development boards consisting of county elected officials, employee representatives, and representatives from local employers.

Three commissioners are appointed by the governor to staggered six-year terms. An Executive Director supervises the Commission from the Austin headquarters.

The mission of the TWC is to promote and support a workforce system that offers individuals, employers and communities the opportunity to achieve and sustain economic prosperity.

Real Property Assets

TWC owns 24 tracts totaling 37.47 acres. In addition, the agency leases many properties across the state.

GLO Recommendations

The GLO recommends the disposal of the following TWC properties: Amarillo Workforce Center, Brownsville Workforce Center, Brownwood Workforce Center, Central Texas Tele-Center, Corpus Christi-Staples Workforce Center, Corsicana Workforce Center, Garland Workforce Center, Grand Prairie Tax Appeals Office, Harlingen Workforce Center, Houston Tax Appraisal and Monitoring Office, Marshall Workforce Center, Paris Workforce Center, Texoma Workforce Board Office, and Waxahachie Workforce Center.

Agency Comments

All comments from TWC have been incorporated into the report.

Texas Facilities Commission Comments

No comments were received from the Texas Facilities Commission regarding TWC.

The surrounding land uses include commercial developments, surface parking, and parking garages.

Recommendation: *Retain for continued agency operations.*

State Real Property Evaluation Report - 2020

ABOUT THE REPORT

ABOUT THE REPORT

Statement of Purpose

Evaluation reports have been prepared in accordance with the Texas Natural Resources Code, Sections 31.157, et seq. This legislation requires that the Asset Management Program Area of the Texas General Land Office (GLO) identify and evaluate designated state-owned real property and accomplish the following:

- identify real property not being used or being substantially underused, and
- determine current market value, for properties recommended for disposition

Appraisal Process

Appraisals are performed by GLO staff or outside third party fee appraisers, whose findings are contained in reports on file in the Agency's Appraisal Division. Field staff measure and examine build-ings to determine structure, composition, and condition. The resulting data is processed using the Marshall and Swift Valuation Service to derive replacement and depreciation values. Using the Market Data approach, area markets are examined, and the current market value of the land is determined.

House Bill 957 of the 79th Legislature requires a value determination for all properties recommended for disposition. If a property is not recommended for disposition, a value determination shall be in a form deemed appropriate by the Commissioner. As such, properties recommended for disposition shall be the subject of a full appraisal while properties not recommended for disposition shall be the subject of an inspection and utilization analysis.

All findings are based on market data and conditions as of the appraisal date. Appraisers do not make forecasts of future market trends not already indicated by current real estate activity.

Evaluation Process

Analysis

The GLO analysis staff reviews appraisal findings and performs additional research to determine the following:

- pattern of land utilization for each facility
 - ◆ land that is economically underutilized
 - ◆ land not being used for agency or facility functions
- development potential for underutilized/unused property

This analysis should be viewed as a preliminary feasibility study which identifies potential alternate uses. Additional research would be necessary prior to marketing the property to insure accurate forecasts of land use, income streams, transaction costs and implementation scenarios.

Evaluation Process

Definition of Terms

Evaluation reports may employ the terms defined below.

Market Value -

The amount one can expect to receive if the property were sold on the open market, and the highest price which a property will bring if offered for sale in the open market, with reasonable time allowed to find a knowledgeable buyer and assuming reasonable financing terms. This definition implies the concept of a willing buyer and seller, neither of whom is put under undue duress and both having been given time to consummate the sale.

As a result of rounding, market value is not expressed as the sum of land, improvements, and site improvements that are reported.

Highest and Best Use -

The most profitable, likely, legal use to which a property can be placed. It is that which may be reasonably expected to produce the greatest net return and/or enjoyment over a given period of time.

Floor-to-Area Ratio (FAR) -

A measure of development intensity used to judge relative land utilization. FAR is the ratio of built gross floor area compared to the gross site area. This factor is a useful index of economic efficiency when compared with typical FARs for given categories of use.

Grade -

The horizontal elevation of a finished surface of the terrain from where a height will be measured.

Lot -

A parcel with a separate number or other designation as shown on a plat.
