Mitigation Needs Assessment:

This Action Plan considers and addresses critical mitigation needs over a large geography while maintaining as much local control as possible through several programs aimed at creating more resilient communities through improved infrastructure, housing, building and land use policies and practices, and hazard mitigation planning.
These programs were developed to meet CDBG-MIT, federal, and state requirements and regulations, as well as to fund mitigation activities that protect against loss of life and property as efficiently and expeditiously as possible. Public service activities including housing and legal counseling, public outreach, and education may need to be utilized to complement several of these programs.
While the majority of funds are allocated to various local and regional mitigation activities—which will encompass any non-planning and non-housing projects, assistance to homeowners through the reconstruction of homes will comprise more than twleve (12) percent of the total allocation. Both the Housing Oversubscription Supplemental Program and the Resilient Home Program will allow the GLO to assist homeowners impacted by Hurricane Harvey to inhabit new homes that are proven to match or exceed HUD’s requirements, creating more resilient communities that recover more quickly from the next disaster event.
As noted above, the GLO recognizes that a comprehensive response to the threats and impacts of natural hazards involves the implementation of well-considered

local and regional mitigation activities in the form of infrastructure projects, buyouts of homes in the floodplain, and other interventions that are vital for the protection, resiliency, and viability of communities. Accordingly, seventy-two (72) percent of the funds will address hazard mitigation needs related to local and regional mitigation activities.
Planning encompasses a wide array of activities that ensure that policies and practices are developed and implemented to reduce impacts from future natural hazards. These activities will be focused on regional approaches to planning in addition to specific local solutions that promote sustainable mitigation planning and policy informed by an evaluation of short- and long-term hazard risk. These activities will involve: (1) the creation of FEMA-approved Local Hazard Mitigation Action Plans; (2) local land use, zoning, and comprehensive plans; (3) regional planning studies; and (4) the adoption of building codes and floodplain ordinances that reduce the risk of future hazard impacts.
The GLO has allocated five (5) percent for administrative costs, including contract administration, compliance monitoring, and the provision of technical assistance to applicants and subrecipients. Based on experience, it is expected that some subrecipients will need direct support implementing their programs; therefore, the GLO is allocating three (3) percent for project delivery. Providing direct support to subrecipients will help ensure that programs are implemented as efficiently and expeditiously as possible. Project delivery costs may include but are not limited to site specific environmental costs, project selection, and application intake/eligibility screening for a specific program.
At least 50 percent of all program funds will benefit LMI persons.
As required, a Mitigation Needs Assessment (the Assessment) was completed to identify longterm risks and investment priorities for CDBG-MIT funding allocated as a result of the 2015 Floods, 2016 Floods, Hurricane Harvey, and the 2018 South Texas Floods. The Assessment takes into account a comprehensive set of data sources that cover multiple geographies and sectors. The Assessment includes specific details about hazard risks within the eligible most impacted and distressed communities, and includes details for housing, infrastructure, and land use. The Assessment may be amended as additional information becomes available or existing information is updated.

Proposed Use of Funds:

The GLO will conduct a mitigation competition to address risks in the 2015 Floods HUD MID and State MID areas. Each applicant may submit a total of two applications, whether applying as the lone applicant or jointly with another jurisdiction(s). Each application must consist of one project. $46,096,950.00.
The GLO will conduct a mitigation competition to address risks in the 2016 Floods HUD MID and State MID areas. Each applicant may submit a total of 2 applications, whether applying as the lone applicant or jointly with another jurisdiction(s). Each application must consist of one project. $149,296,701.36.
The GLO will conduct a mitigation competition to address risks in the Hurricane Harvey HUD MID and State MID areas. Each applicant may submit a total of three individual applications and three joint applications. Each application must consist of one project. $975,704,817.11.
The GLO will conduct a mitigation competition to address risks in the 2018 South Texas Floods HUD MID and State MID areas. Each applicant may submit a total of two applications, whether applying as the lone applicant or jointly with another

jurisdiction(s). Each application must consist of one project. $4,047,240.
Harris County will develop a local MOD for allocation of funds to eligible entities, including units of local government, special purpose districts, and port and river authorities. The GLO encourages the prioritization of regional investments with regional impacts in risk reduction posed by hurricanes, tropical storms and depressions, flooding, wind and other hazards to develop disasterresistant infrastructure; upgrading of water, sewer, solid waste, communications, energy, transportation, health and medical, and other public infrastructure to address specific, identified risks; financing multi-use infrastructure; and green or natural mitigation infrastructure development. $750,000,000.
Under the Regional Mitigation program (COG MODs), each COG region impacted by Hurricane Harvey has been allocated funds. Each COG will develop a local MOD for allocation of funds to local units of government and Indian tribes. $1,166,997,000.00.
The Hazard Mitigation Grant Program (HMGP) is one of the three FEMA Hazard Mitigation Assistance (HMA) grant programs. HMGP provides up to 75 percent of the eligible costs associated with hazard mitigation projects selected for funding. Selected subrecipients must contribute at least 25 percent of the total project costs, known as match or non-federal share. $100,000,000.00
The GLO Coastal Resources division conducts ongoing coastal planning efforts through the Texas Coastal Resiliency Master Plan (Resiliency Plan) as described in Mitigation Needs Assessment. $100,000,000.00.
The Hurricane Harvey Homeowner Assistance Program (HAP) is a state-run housing program administered under the State of Texas Plan for Disaster Recovery: Hurricane Harvey for $5.676 billion in CDBG-DR funding. At present, the HAP program is oversubscribed, with the number of HAP applications for assistance exceeding the available program funds needed to move forward with reconstruction of damaged homes. Consequently, HAP applicants eligible for assistance are being waitlisted until further funding becomes available. $400,000,000.00.
The Resilient Housing Program (RHP) will replace owner-occupied single family homes damaged by Hurricane Harvey with a reconstructed home that meets additional resiliency and mitigation standards required of the RHP. Eligible participants will be drawn from the GLO’s existing waiting list of eligible HAP applicants. $100,000,000.00.
The GLO is partnering with the Texas Division of Emergency Management (TDEM) to provide CDBG-MIT funds for the development of an enhanced State of Texas Hazard Mitigation Plan (enhanced SHMP), as well as providing funds for the development of Local Hazard Mitigation Plans (LHMP) for eligible areas. $30,000,000.00
The GLO supports the adoption of policies that both reflect local and regional priorities and will have long-lasting effects on community risk reduction. The Resilient Communities Program will fund the development, adoption, and implementation of modern and resilient building codes and flood damage prevention ordinances to ensure that structures built can withstand future hazards. $100,000,000.00.
The GLO is committed to the purposes of planning in the areas that are eligible for CDBG-MIT funds, and to the completion of some of the projects identified as a result of the studies. $115,091,280.53.

State administrative costs including subrecipient administration costs will not exceed five (5) percent, $215,092,050.00.
Based on experience, it is expected that some subrecipients will need direct support implementing their programs; therefore, the GLO is allocating three (3) percent for project delivery. $129,055,230.00.

TEXAS A&M AGRILIFE EXTENSION SERVICE	Other	$ 1,633,786.00

Location Description:

This project will assist communities impacted by other disasters in the HUD identified most impacted and distressed areas.

Activity Description:

The Texas A&M AgriLife Extension Service will perform or cause to be performed, through its Disaster Assessment and Recovery Program and Texas Community & Watershed Program, services to develop, deploy, and support a range of CHARM (Community Health and Resource Management)-based geographic information system (GIS) applications for data- and mapsupported community planning and decision-making. The CHARM software is currently bolstering local planning efforts by running scenario planning workshops with local communities. When integrated with the disaster database project, this enhancement would provide local communities with the information, tools, and technical expertise to make informed planning decisions.

Location Description:

This project will assist communities impacted by other disasters in the HUD identified most impacted and distressed areas.

Activity Description:

The Texas A&M AgriLife Extension Service's Green Infrastructure for Texas (GIFT) Program empowers Texans, such as those affected by disasters, to build resilient communities adaptable to social, economic, and environmental change. The GIFT Program provides necessary resources about nature-based solutions to stormwater management. Through outreach, coalitionbuilding, education, and on-the-ground projects, GIFT inspires communities to implement Green Infrastructure (GI) projects at any scale.

TEXAS A & M UNIVERSITY AT GALVESTON	Other	$ 3,000,000.00

Location Description:

This project will assist communities impacted by other disasters in the HUD identified most impacted and distressed areas.

Activity Description:

Texas A&M University will conduct the Measuring, Mapping, and Managing Flood Risk in Texas, Part 1 (“M3FR1”) comprehensive planning study. M3FR1 developed the Damage Plain, a new flood risk visual, to better map and communicate the reality of flood risk beyond the traditionally used Federal Emergency Management Agency’s 100-year floodplain mapping. The second part of the Measuring, Mapping, and Managing Flood Risk in Texas planning study (“M3FR2”) will improve flood risk communication by integrating multiple types of hydrologic and hydraulic models. The Texas General Land Office is leveraging the Measuring, Mapping, and Managing Flood Risk study completed by Texas A&M to expand the disaster plain to the mitigation area and further refine disaster risk communication tools for communities to use.

TEXAS A&M AGRILIFE RESEARCH	Other	$ 18,366,215.00

Location Description:

This project will assist communities impacted by other disasters in the HUD identified most impacted and distressed areas.

Activity Description:

Using a combination of 2018, 2019, and MIT funding to provide better service for vulnerable regions, the Texas GLO is working with Texas A&M AgriLife Extension Service to enhance existing Community Health and Resources Management (CHARM) capabilities to provide regional planning and coordination capabilities. This will require super-computing capabilities and large-scale stakeholder engagement for the Lower Rio Grange Valley (LRGV) and East Texas communities affected by the 2018 & 2019 disasters. In addition, CHARM workshops to walk communities through the process of developing RCP/LHMPP plans and create a training program to increase local competence and capacity.

Activity Description:

The Texas Water Development Board shall perform a River Analysis System parallelization approach will allow large scale, ~>2M cells, models to be run by leveraging the large number of nodes available in an high-performance computer environment. More importantly, this parallelization approach will significantly reduce computational time, from days to tens of minutes, required for medium to large scale Hydrologic Engineering Center-River Aanalysis System model simulations. Per the GLO's Mitigation Action Plan, as amended, this grant satisfies policy planning/management capacity building activities which will enable the GLO to carry out management, coordination and monitoring of activities necessary for effective planning implementation.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Deep East Texas Council of Governments (DETCOG)	Local Government	$ 6,613,064.00

Location Description:

Construction shall take place at Deep East Texas Council of Governments (DETCOG) at Cell Tower 71, 67, 72, 73, 75, 78, 79, 80, 82, SBA Tower, and Fiber Optic Lines in Northern Newton County.

Activity Description:

Deep East Texas Council of Governments (DETCOG) shall install aerial and buried fiber optic lines to connect existing cell towers to the internet backbone. For towers where a direct fiber connection is not feasible, point-to-point microwave link technology will be utilized. All associated appurtenances will be completed. These activities will meet the low to moderate income national objective.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Hitchcock	Unknown	$ 3,598,615.00

Location Description:

Construction shall take place in the City of Hitchcock at City Wastewater Treatment Plant.

Activity Description:

The City of Hitchcock shall automate operations, with replacing components of the clarifier splitter box between the existing two final clarifiers scheduled for replacement of collection equipment, and replacement of the collection equipment of the stormwater clarifier, and complete all associated appurtenances. These activities will meet the low to moderate income national objective.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Freeport	Local Government	$ 1,838,000.00

Location Description:

Construction shall take place in the City of Freeport at Avenue F Water Tank and Avenue F Water Pump Station.

Activity Description:

The City of Freeport shall construct a new pump station slab with rain covering and installation of pumps; rehabilitate an existing pump station including replacment of electrical system and HVAC; rehabilitate an existing 500,000-gallon ground storage water tank including replacement of roof vent, hatch, and level indicator; drain, clean, and surface prep the tank; coat both inside and outside the tank; and complete associated appurtenances for the City of Freeport Water Improvements project. This activity will meet the low- and moderate-income national objective through the use of city-wide LMISD.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Hitchcock	Unknown	$ 3,864,200.00

Location Description:

Construction shall take place at the City of Hitchcock Wastewater Treatment Plant at Hacker Rd.

Activity Description:

The City of Hitchcock shall demolish an existing tank; construct a new elevated base structure and a building to enclose equipment; install two (2) fan presses; install a holding tank with associated equipment for aeration, mixing, and decanting; perform electrical improvements; and complete associated appurtenances for the City of Hitchcock Wastewater project. These activities will meet the low- and moderate-income national objective through the use of city-wide LMISD.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Aransas Pass	Local Government	$ 5,086,700.00

Location Description:

Construction shall take place in the City of Aransas Pass Stormwater Pump Station #3 at South Euclid St.

Activity Description:

The City of Aransas Pass shall demolish the old pump station; construct a new pump station facility to include a new wet well, pumps, generator, SCADA controls, new pipes across the berm, trash rack screens stabilization, and installation of new flood gate control structures; and complete associated appurtenances for the City of Aransas Pass Stormwater Pump Station project. This activity meets the low- and moderate-income national objective through the use of city-wide LMISD with the state Standardized Area Median Income (SMI) waiver.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Refugio, Town of	Local Government	$ 2,813,300.00

Location Description:

Construction for the Whitlow Street project shall take place in the City of Refugio along Huisache Street, Tallow Drive, La Cost Street, West Heard Street, West Bailey Street, Magnolia Drive, Lantana Street, and Douglas Street.
Construction for the Whitlow Subdivision Drainage project will take place in the City of Refugio along Magnolia Drive, Huisache Street, West Heard Street, Tallow Drive, Lantana Street, Douglas Street, La Cost Street, and West Bailey Street.
The Whitlow Subdivision Drainage project service area totally encompasses the service area for the Whitlow Street project. Beneficiaries are only counted once. All other service areas are distinct.

Activity Description:

Street Improvements
The City of Refugio shall excavate site, regrade and repair the existing road base, and complete associated appurtenances for the Whitlow Street project.
Flood & Drainage
The City of Refugio shall construct a new underground storm sewer with adjacent functionally dependent junction boxes and complete associated appurtenances for the Whitlow Subdivision Drainage project.
This activity meets the low- and moderate-income national objective through the use of surveys.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Deep East Texas Council of Governments	Unknown	$ 45,031,528.00

Location Description:

Construction for the Broadband Infrastructure project shall take place in Deep East Texas Council of Governments within Jasper County Fiber Optic Cable, Newton County Fiber Optic Cable, Polk County Fiber Optic Cable, San Jacinto Fiber Optic Cable, Tyler County Fiber Optic Cable, Jasper County Towers, Newton County Towers, Polk County Towers, San Jacinto County Towers, and Tyler County Towers.
Construction for the Interoperable Radio Communications Infrastructure project shall take place in Deep East Texas Council of Governments along Tower 35 - FCC Reg. 1224812, Tower 34 - FCC Reg. 1224721, Tower 36 - FCC Reg 1225416, Tower 30 - FCC Reg. 1215846, Tower 12 - FCC Reg. 1050705, Tower 4 - FCC Reg. 1029517, Tower 20 - FCC Reg. 1055108, Jasper County Sheriff Communications Tower, Newton County Sheriff Communications Tower, San Jacinto County Sheriff Communications Tower, Polk County Sheriff Communications Tower, and Tyler County Sheriff Communications Tower.

Service areas for each project are the same and were based on Census Tract Block Group LMISD. Based on the analysis of the service areas, a significant portion of these 5 counties benefitted and these projects will therefore be considered to provide a benefit to the entire counties.

Activity Description:

Deep East Texas Council of Governments shall install aerial and underground fiber optic cable, point-to-point microwave links, and tower attachments in the counties of Jasper, Newton, Polk, San Jacinto, and Tyler for the Broadband Infrastructure project.

Deep East Texas Council of Governments shall install radio frequency antenna systems and communications consoles, execute capital leases on communication towers, and complete associated appurtenances for the Interoperable Radio Communications Infrastructure project.

These activities meet the low- and moderate-income national objective through the county-wide LMISD with the state Standardized Area Median Income (SMI) waiver for counties Jasper, Newton, Polk, San Jacinto, and Tyler, for the Broadband Infrastructure and Interoperable Radio Communications Infrastructure projects.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Wharton, County of	Local Government	$ 9,009,064.42

Location Description:

Construction for the Boling Drainage project shall take place in Wharton County along Gulf Street, Vacuum Avenue, Roxanna Street, Sun Street, Texas Avenue, Atlantic Avenue, Rycade Road, and Hobbins Street.
Construction for the Blue Creek Drainage project shall take place in Wharton County along Blue Creek, and Wharton County Detention Pond east of US Hwy 59.

Activity Description:

Wharton County shall acquire easements, upsize storm sewer pipes, replace culverts, regrade ditches, reconstruct streets, and complete associated appurtenances for the Boling Drainage project.
Wharton County shall acquire property, excavate channel, install pipe, build detention pond with a spillway, riprap slope, add fencing, revegetate area, and complete associated appurtenances for the Blue Creek Drainage project.
This activity consolidates the distinct service areas of each of the above projects into one total reportable area. The projected beneficiaries in the Measure tab represent the “Total Number of Persons” to benefit from all projects’ service areas.
These activities meet the low to moderate national objective through the use of surveys for the Boling Drainage project and census tract and block groups with the state's Standardized Area Median Income (SMI) waiver for the Blue Creek Drainage project.
Please see the Documents tab for a detailed breakout of each individual service area.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Santa Fe	Unknown	$ 2,703,634.40

Location Description:

Construction for the North Road Improvements project shall take place within the City of Santa Fe along 12th Street, North Main Street, 13th Street, Avenue H, 16th Street, and 17th Street.
Construction for the South Road Improvements project shall take place along Avenue M, Mulberry Street, 18th Street, 22nd Street, 21st Street, Avenue L, West 23rd Street, East 23rd Street, Avenue K, and 24th Street.
Service areas for each project are distinct.

Activity Description:

The City of Santa Fe shall rehabilitate current roadways, which includes a full depth repair finished with a final surface of asphalt, and complete associated appurtenances for both the North Road Improvements and South Road Improvements projects. This activity consolidates the distinct service areas of each of the above projects into one total reportable area. The projected beneficiaries in the Measure tab represent the “Total Number of Persons” to benefit from all projects’ service areas. This activity meets the low- and moderate-income national objective through the use of surveys.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Livingston	Unknown	$ 2,541,000.00

Location Description:

Construction for the Willis Street Improvements project shall take place in the City of Livingston along Willis Avenue, W. West Street (Storm sewer), and N. Pine Avenue (ditches) for the Willis Street Improvements project.
Construction for the West Street Rehabilitation project shall take place in the City of Livingston along West Street from North Beatty Avenue to North Houston Avenue for the West Street Rehabilitation project.

Activity Description:

The City of Livingston shall remove and replace concrete pavement, improve driveway inlets, and complete associated utility relocation. Utility relocation includes installation of water and sanitary sewer lines, reshaping of drainage ditches, completion of storm sewer system improvements, and completion of all associated appurtenances.
The City of Livingston shall remove and replace concrete pavement, install new water and sanitary sewer lines, improve driveway inlets and drainage, and complete associated appurtenances for the West Street Rehabilitation project.
This activity consolidates the service areas of each of the above projects into one reportable area that does not double count overlapping areas. The projected beneficiaries in the Measure tab represent the “Total Number of Persons” to benefit from all projects without duplicating the same beneficiaries from overlapping project service areas.
These activities meet the low- and moderate-income national objective through the use of census tract and block group with the State Standardized Area Median Income (SMI) waiver applied for the above projects.
Please see the Geography tab for census defined activities.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Fort Bend County	Local Government	$ 36,333,541.00

Location Description:

Construction for the Evacuation Route - US 59/IH 69 Bridge River Bank Erosion Repair project shall take place in Fort Bend County along the Brazos River.

Construction for the Mustang Bayou Detention Basin project shall take place in Fort Bend County at 3823 Kansas St, Fresno.

Activity Description:

Fort Bend County shall prepare, clear, and grub site, seed, excavate, stockpile, backfill, dispose of material, install stone, and complete associated appurtenances for the Evacuation Route - US 59/IH 69 Bridge River Bank Erosion Repair project.
Fort Bend County shall acquire land, excavate and dispose material, construct detention basin including weir, outfall pipes, backslope interceptor structure, and complete associated appurtenances for the Mustang Bayou Detention Basin project.
This activity consolidates the service areas of each of the above projects into one reportable area that does not double count overlapping areas. The projected beneficiaries in the Measure tab represent the “Total Number of Persons” to benefit from all projects without duplicating the same beneficiaries from overlapping project service areas. This activity meets the low- to moderate-income national objective through the use of census tracts and block groups for the Evacuation Route - US 59/IH 69 Bridge River Bank Erosion Repair project and use of surveys for the Mustang Bayou Detention Basin project.
