AUSTIN — The Texas General Land Office (GLO) is partnering with Texas Parks & Wildlife Department (TPWD), Corpus Christi Code Enforcement and Solid Waste Services to offer local coastal Texans the opportunity to remove inoperable and derelict vessels through the Vessel Turn-In Program (VTIP), free of charge. Designed to provide owners with a voluntary method of disposal, interested boat owners are encouraged to participate if the vessel is less than 26 feet long, with longer boats being accepted on a case by case basis. Vessels are being accepted April 24 through April 28 from 9 a.m. to 4 p.m. at the Laguna Madre Wastewater Treatment Plant.

"Abandoned and derelict vessels have long plagued the Texas coast, threatening public safety, navigation and our environment," said Land Commissioner George P. Bush. "Removing abandoned or sunken vessels can be hazardous and expensive for the State of Texas. The Vessel Turn-In Program provides local boat owners a voluntary method to dispose of their run-down vessels in a safe, environmentally-conscious manner and saves tax dollars on a net basis."

Date and time: April 24-28, 2018, from 9:00 a.m. to 4:00 p.m.

Drop-off location: Laguna Madre Wastewater Treatment Plant, 201 Jester St, Corpus Christi, TX 78418

---

The disposal of this boat in Corpus Christi brought the length total of boats collected over the one-mile mark!

---

Thus far the GLO has conducted ten VTIP collections in Brazoria, Calhoun, Galveston, Nueces, and Matagorda counties. To date, the VTIP program has disposed of 436 vessels with a combined distance of the length of disposed boats of 7,366.5 feet, which is more than a mile of derelict boats! The total estimated cost savings to the state to remove these vessels if abandoned in coastal waters is more than \$1.7 million.

The Texas GLO and TPWD will verify the vessel (boat) qualifies for disposal. Potential participants may contact the GLO or the County Commissioners listed above with questions or to pre-register a drop off at (361) 552-8081.

#### Background - Texas GLO's Oil Spill Prevention and Response

Working with petroleum and commercial fishing industries, U.S. Coast Guard and the public, Oil Spill Prevention and Response staff support educational opportunities, daily water and shore patrols and firehouse-ready response teams to prevent and immediately address environmental problems - because even the smallest spill can endanger Texas' precious natural resources. Abandoned vessels can leak fluids into coastal waters that can be harmful for the wetland environment, wildlife and humans. With hundreds of millions of barrels of crude oil and petroleum products passing through ports, bays and beaches along the Texas Gulf annually, the Texas General Land Office Oil Spill Prevention and Response team is on call 24/7, ensuring oil stays out of Texas coastal waters.
